## International Seminar

### “Establishing the first Regional Centre for Expertise on Education for Sustainable Development in the Czech Republic”

The Charles University Environment Center in cooperation with Jan Evangelista Purkyně University invite you to participate in an international seminar on establishing the first Regional Centre for Expertise (RCE) on Education for Sustainable Development (ESD) in the Czech Republic and the first anywhere in Europe from behind the former Iron Curtain outside Russia.

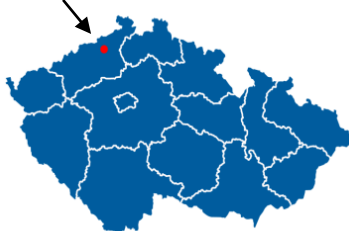

**Date:** 9/10 February, 2012

**Location:** Rectorate assembly hall ('aula'), Jan Evangelista Purkyně University, Hoření 13, Ústí nad Labem, North Bohemia

**Registration fee:** None

RCES are networks of local or regional institutions working together to promote all types and levels of learning for a sustainable future. The RCE concept is the brainchild of the United Nations University created to overcome the difficulty of reaching international consensus on the nature and scope of ESD. An RCE is primarily a means of encouraging dialogue among diverse parties to share information and experience and to seek ways of promoting inter-disciplinary and multi-sectoral collaboration for ESD. The normally include universities, NGOs, regional and municipal governments, schools, museums, etc. The seminar will be addressed by leading European experts on ESD and representatives of existing European RCEs.

Ústí nad Labem

To enrol for the seminar, register [here](#). For more information about the seminar and the programme, go to the [English homepage of the MOSUR project website](#) (International Interdisciplinary Sustainability Network) or write to the seminar organiser, Andrew Barton, at [andrew.barton@czp.cuni.cz](mailto:andrew.barton@czp.cuni.cz).

To learn more about RCEs, go to the [UNU-Institute of Advanced Studies Global RCE Service Centre website](#).
