

Sustainability field trip to the old Hanseatic city of Lüneburg in Lower Saxony, Germany

9-14 June 2013

The Charles University Environment Center invites Czech students studying (any academic discipline) at the Bachelor's level at a university outside Prague to enrol on its six-day field trip to the beautiful university town of Lüneburg to study how 'sustainability' is applied in theory and in practice in the German context.

Den 6: Waste management - visit to the landfill and recycling centre at Bardowick; return to Prague

The trip is fully funded for Czech students, including **transport, accommodation and meals**; a small returnable bond, however, will be charged for all successful applicants. The only requirements are a good knowledge of English and an eagerness to learn more about sustainability.

There are a limited number of places on the field trip, so be sure to apply early [via this link](#).

The field trip is run as part of the MOSUR project and with the assistance of our partner, Leuphana University of Lüneburg.

For more information, go to www.mosur.czp.cuni.cz or look for MOSUR Sustainability Field Trips on [Facebook](#).

If you have any questions, contact Andrew Barton at andrew.barton@czp.cuni.cz

Indicative programme:

Day 1: Departure from Prague by bus.

Day 2: *Sustainable Campus & Sustainability* in the Leuphana University of Lüneburg Curriculum

Day 3: 100% Renewable Energy for Lüneburg & visit to Hamburg's 'Georgswerder Energy Hill'

Day 4: Visits to the Alfred Toepfer Academy for Nature Conservation & Baukhof organic agriculture in Amelinghausen

Day 5: German Green Party politics; environmental education; visit to Biosphaerium Elbtalau
